Re: TFG Testimony for Timematters and Timeslips

Dear Michele,

The Futures Group is a progressive and innovative HR consultancy firm that manages a range of projects and consultancy services to government and private sector clients.

As a growing business the need to implement an integrated contact management, project management and time management solution became a priority at the beginning of 2008. Through the implementation of *Timematters* we have been able to create an environment where consultants are accountable for their project and client management and we have the ability to record meaningful and easily accessible information relating to clients and projects. All time is recorded accurately against projects to give a clear indication of profitability and detailed invoicing. Information is more easily shared and overall provides a more collaborative working environment.

Following the successful implementation of *Timematters* in July 2008 we moved to integrating our accounting system with the add on feature *Timeslips*. We now have a fully computerised accounts system which requires minimal data entry and we have the ability to run complex financial management reporting with the click of a button.

The support received from *Timematters* has been exceptional. All requests for support are responded to in a timely manner and tailored to meet our individual and business needs.

Yours Sincerely

Kerry Neill
Director, The Futures Group
